

SUWAT PUNKHIEW

APPLIED AI ENGINEER

+094-482-4448

suwat.pkh@gmail.com

Bangplee, Samutprakarn, Thailand

PROFESSIONAL SUMMARY

An Applied Artificial Intelligence graduate with 8 months of hands-on internship experience in Industrial Software Development. Proven track-record in deploying production-ready systems, from hardware-software integration (VB.NET/RS232) to AI prototypes using Computer Vision (YOLO) and Predictive Analytics (Linear Regression). Strong ability to bridge the gap between technical AI solutions and business requirements. Highly adaptable, results-oriented, and ready to contribute to impactful AI or Software Engineering roles immediately.

EDUCATION

Bachelor of Science in Applied Artificial Intelligence and Smart Technology **2022 - Present**

Burapha University

- Relevant Coursework: Machine Learning, Predictive Analytics, Object-Oriented Programming, Database Management Systems, Data Analysis, Robotics & Automation, and Software Architecture.

PROFESSIONAL EXPERIENCE

Sinfonia Technology (Thailand) Co., Ltd.

- Torque Data System:** Developed and deployed a "Torque Data Recording and Verification System" using VB.NET, interfacing with hardware via RS232 protocols to automate factory data tracking and ensure production quality.
- Computer Vision:** Developed an AI prototype for Wire Detection and Classification using the YOLO (You Only Look Once) framework, enhancing automated inspection capabilities in the manufacturing process.
- Predictive Stock Analytics:** Engineered a Stock Forecasting prototype by implementing Linear Regression models; conducted extensive Feature Selection (including historical sales, time-series data, and inventory levels) to optimize purchase order predictions.
- Collaboration:** Partnered with the industrial team to align AI and software solutions with operational standards, significantly improving workflow efficiency and data integrity.

TECHNICAL SKILLS

Programming Languages

- Python
- VB.NET
- SQL
- HTML
- CSS
- JavaScript
- PHP

Tools & Infrastructure

- Docker
- Git
- Arduino
- Power BI
- KNIME
- DOBOT magician

AI & Machine Learning

- Predictive Modeling
- Object Detection (YOLO)
- Custom Small LLMs(CHATBOT)
- Hugging Face
- Robotics AI

ADDITIONAL INFORMATION

- Languages:** Thai (Native) , English (Intermediate).
- Activities:** Technical Mentor (Module 3: AI in Business): Provided strategic guidance and technical consultation to multi-year student teams (Sophomores & Juniors)
 - Advised on AI implementation and Code architecture for Sophomores to ensure system scalability.
 - Mentored Juniors on Business Pitching and Value Proposition to effectively bridge technical solutions with business needs.
